

«STORMFORCE 20»

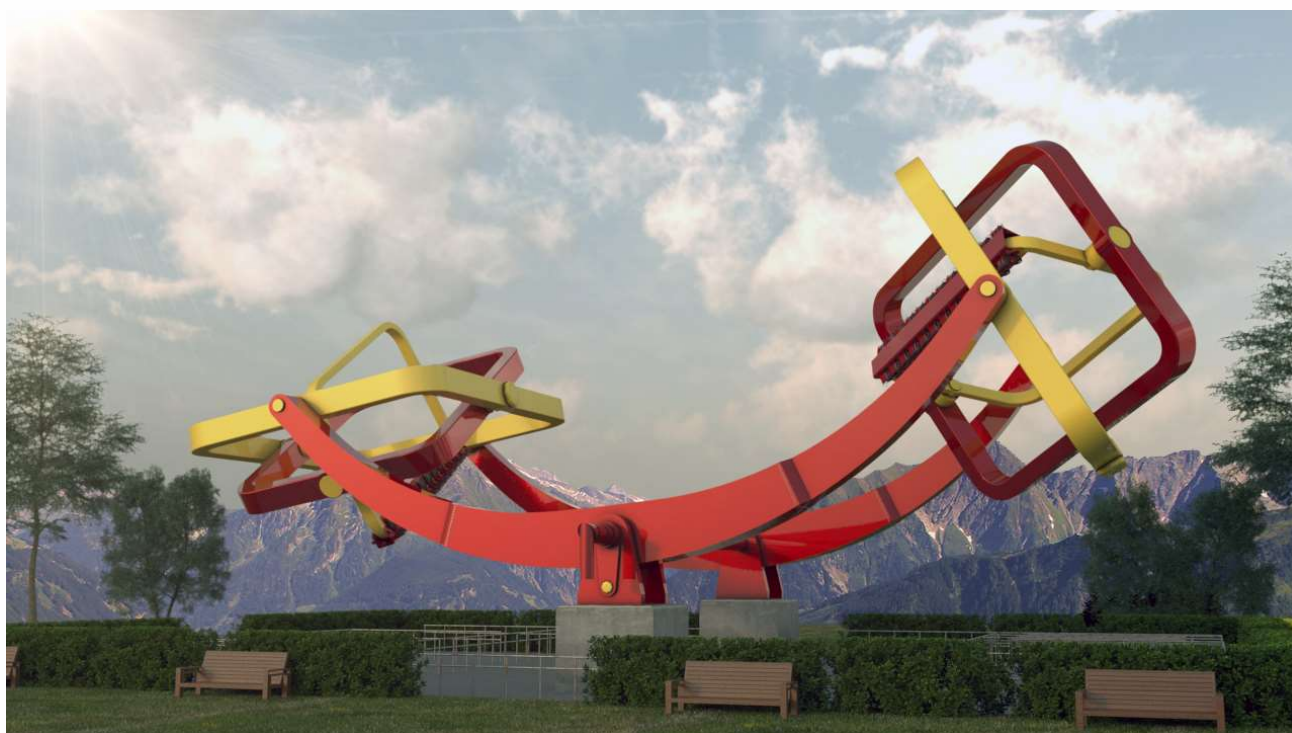

Description

Stormforce 20 is a new Thrill-Ride with a multi-dimensional and varied riding experience.

The Stormforce 20 consists of two motorized gyroscopes attached to a reversed pendulum. By this pendulum movement can be driven simultaneously with one gondola and loaded with the other.

The 24 passengers, who sit back-to-back in two rows of 12 people (per gondola), experience 360 ° turns in all directions.

Stormforce 20 is available as Park Version or as Travel Version.

Patent Pending

All technical data are approximate and subject to change. Each ride we build fulfils the DIN/EN, ASTM or GB Standards, following our customers' requirements.

Technical data

ride type	Thrill Ride
ground space	approx. 38 x 20 m
total height	approx. 22 m
number of passengers	48 (24 per gondola)
ride time	approx. 75 sec.
load / unload	approx. 75 sec.
dispatch interval	approx. 75 sec.
theoretical capacity	approx. 1150 pph
power requirements	200kW / 400A / 3x400V / 50Hz
age limit	12 years (1.40 m)
